Bilateral Meetings

- Thursday 10:30 - 12:30
- Thursday 14:30 - 17:30

Description

Specifically designed for oncology doctors and hospitals, OncoStats is a unique clinical tool that allows oncology data to be registered in a systematic, validated and structured manner in a database. At our core, we "unlock the access" to computerised clinical data, producing real-world evidence (RWE), whose impact weighs heavily on the healthcare industry and the future of oncology care.
